## **DETAILED ACTION**

### ***Response to Amendment***

1. In response to the Amendment received on January 27, 2004, the examiner has carefully considered the amendments. The examiner acknowledges the cancellation of claim 53, 57-58 and 66.

### ***Response to Arguments***

2. Applicant's arguments, see Amendment, filed January 27, 2004, with respect to claims 45-66 have been fully considered and are persuasive. The rejection of claims 52-57 and 60-61 under 35 USC 102(e) as being anticipated by Koreltz (5,637,599) has been withdrawn. The rejection of claims 45-46 and 49-51 under 35 USC 102(e) as being anticipated by Wang et al (5,944,707) has been withdrawn. The rejection of claim 62 under 35 USC 102(b) as being anticipated by Hauser et al (4,464,680) has been withdrawn. The prior art made of record fails to expressly teach and/or fairly suggest a method of applying a protective coating to a substrate comprising the method step as outlined by the instantly claimed invention.

### ***Allowable Subject Matter***

3. Claims 45-52, 54-56, and 59-65 are allowed.
4. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is the steps of applying an acrylic latex primer composition to a substrate and drying then applying a radiation curable coating composition to said dried but uncured primer layer and then curing both layers with ultraviolet radiation, wherein said acrylic latex comprises an ammonium salt of a styrene-maleic anhydride copolymer. The instantly claimed stripper composition is deemed novel in view of the prior art, also. The primary reasons being the n-octylamine, benzyl alcohol and glycolic acid combination in the composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
